

BI Wizards Corporation

The leader in Oracle BI Consulting Services

What We Do

BI Wizards offers a variety of business intelligence and data warehousing services that empower our clients to effectively manage their most important resource. We provide complete lifecycle business intelligence project services focusing on knowledge transfer and leading practices to enable our customers to take ownership is their solution.

Our dynamic team is the best in the industry. With decades of combined experience and hundreds of implementations, we are able to create customized solutions for clients in various industries and areas across the country. Our consultants not only are experts in business intelligence but also have varied backgrounds in Accounting and Finance, Sales Management, Human Resources, Operations, and many more disciplines. This allows our consulting hit the ground running and allowing us not only to implement the technology but understand the best possible deployment based on your needs.
